

Call for projects 2016

La Fondation Motrice announces its 2016 call for projects. A total budget of €400,000 will be divided between 2 distinct calls. As part of these calls for projects a LFM- SESEP price for a project on rehabilitation in early childhood, a LFM- FFAIMC price of the families and a LFM-CDI price for a physiotherapist may be awarded.

The themes of these 2 calls are:

CALL FOR PROJECTS «REHABILITATION»

As to support the development of good practice guidelines in rehabilitation, La Fondation Motrice intends to provide grants for projects that would bring additional evidence in the field of motor or cognitive rehabilitation in persons with Cerebral Palsy.

CALL FOR PROJECTS « GENERAL »

La Fondation Motrice seeks to support any experimental or clinical trial or technological research concerning Cerebral Palsy, its prevention and its consequences for patients whatever their age.

Beneficiaries

Any research team, any medical and paramedical team or engineers or health economist working in a public or private hospital or university, in an institution or at home in European countries

Each project leader can be a candidate in only one call for projects of the Foundation

Selection by the Scientific Board will take place in two steps:

- Letter of intent (deadline : June 20th 2015 at the latest)
- Complete research proposal application, only for the pre-selected candidates (deadline : November 1st 2015 at the latest)

For more information and to answer to the call please download the document « Call for Projects LFM 2016 » as well as the letter of intent and full application forms:
